- Enclosed ball bearings
- Single fork roller has plated end cap
- 5-1/2" cushion-grip handle

**... CHANGE TO STAND-UP SEAM ROLLERS IN SECONDS!**

**CUSHION-GRIP HANDLE - 5-1/2" long**

Our convertible seam rollers have a 5-1/2" cushion-grip handle that provides a more comfortable, no-slip grip. These rollers are perfect for hands-on work, when getting close to the work area, or using more pressure on the work surface, is important.

**MR02400 - 60" (5 ft.) long fiberglass handle**

Sold separately, the 60" handle converts the seam roller into a "stand-up" version, giving you two tools in one. The handle's threaded steel tip easily screws into the 5-1/2" cushion-grip handle. The stand-up roller is ideal for rolling out seams while standing, when less pressure is required.
